DETAILED ACTION

1. Applicant's Pre-Amendment filed October 10, 2003 has been entered. Claims 1 – 35 have been canceled.
2. Applicant's information disclosure statements (IDSs) have been considered by the Examiner.
2. Claims 36 – 45 are presented for the examination.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 36 – 45 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 36 and 41 claim first and second configurations to which the input and output terminals of an integrator circuit accordingly couple. In these claims, the configurations are said to change the polarity of the integrator circuit. It is unclear by "polarity of the integrator circuit" since the claims mention nothing about whether the polarity is the polarity of the inputs, or the outputs because the integrator circuit has at least inputs, outputs, and power supply lines.

Specific polarity change to what terminals is required for clarity to overcome this type of rejection.
